

2. TECHNICAL ANALYSIS

SCOPE OF WORK

1. **Vehicle / Equipment Booking:** The site users / client will be able to book the equipment for rent from the front-end. All the available and active vehicles / equipment added by the Admin will be displayed. Client will choose the vehicle, and can see the vehicle availability on the calendar. The client will select the available date and process with the booking / renting. Once the booking is made, the email will be sent to the Admin and the Client.
2. **Equipment:** This module will enable the administrator to manage the company's equipment and vehicles. Equipment Details like Make, Model etc. will be added.
3. **Equipment / Vehicle Availability Management:** Manage the vehicle / equipment availability as per the date.
4. **Booking Management:** The booking made by the client will be listed and Admin can manage the booking accordingly.
